

## **DUST CONTROL POLICY**

The Hardin County Secondary Road Department will provide dust control in front of residences on the rock road system under certain conditions. In order to be eligible a road must meet the following conditions:

Roads that carry traffic volumes in excess of 30 trucks per hour on the average for an 8 hour period would qualify. The traffic volume will be determined by the number of trucks hauling out of various point sources when considering cycle time. Dust control applications will be limited to a maximum of three times per summer.

Haul roads leading from paving plants on rock road systems will be dust controlled. Also designated detour routes that are to be utilized over a seven day period and result in an increase in daily vehicle traffic exceeding 100 vehicles per day will be dust controlled in front of residence.
